

Let Dr. Sam Rizk give you the perfect pouty lip

Want a smacker like Kylie Jenner? Pouty lips are back on trend and getting them done correctly is important. Known for his innovative procedure that has minimum recovery time and patients rarely bruise, Manhattan Facial Plastic Surgeon, Sam Rizk, MD, FACS is the popular choice for getting face work.

“The advantage of a lip lift procedure is that if it's done well, you can't tell, whereas, overfilled lips can cause a distorted appearance,” says Dr. Rizk. “Lifted lips look more youthful and shapely, and we can achieve a very natural results.

If fillers aren't floating your boat, Dr. Rizk has developed a revolutionary lip lift procedure to rejuvenate thinning lips and achieve a better shape and fullness. It can do more than simply adding volume. The technique can extend the lip borders, even out asymmetries, shorten the distance between the upper lip and the nose that often occurs with aging, and correct drooping corners.

“Full, pillowy lips are often associated with fertility and increased sexuality in our subconscious,” explains Dr. Rizk. “With the lips, unlike the rest of the face, it's not always about looking younger, but achieving better facial balance for a more classically beautiful appearance.”

If you're looking for plump, full lips without looking like a Beverly Hills Housewife, American Board of Facial Plastic and Reconstructive Surgery member Dr. Sam Rizk is the man to see. To learn more about his practice or consultation call 212-452-3362 or visit www.dr.samrizk.com.
