Dr. Rizk is outstanding in every way. His artistry, surgical skills and compassion define him as the most incredible professional. I am deeply impressed with the time he takes to assure you of his suggestions and am so pleased that I trusted him completely as he has THE eye and hands to do what he says he will accomplish. I am a professional woman and was back at my office after 8 days of surgery( face lift and laser) looking refreshed and, according to my partners, "ravishing"-no one had a hint of what occurred 8 days prior. He is a master at what he does and a wonderful human being which makes the experience special beyond words.
