

May 26, 2009

Dear Dr Rizk,

Thank you from the bottom of my heart for the exuberance and delight I feel over my new nose and chin. As discussed I am faxing you and emailing you copies of an article that touched me deeply regarding scores of disfigured women in Asia, victims of the mindless egotism of wreckless men. One can but imagine the toll in human suffering. I know you are a caring and compassionate doctor who could help heal the faces of these broken women, hapless victims of outrageous misfortune. I believe these women

can benefit immensely from the extraordinary skill you wield. You have the God given talent to turn around many lives. I will do whatever I can do assist your benevolent efforts and aspirations. I will do more research on the Acri Survivors foundation and on SAKHI (domestic violence victims).

Thank you truly, for being
you.

Morini
